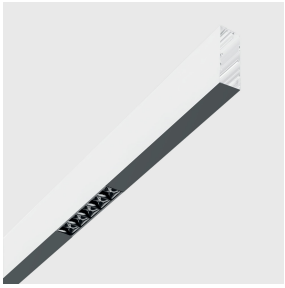
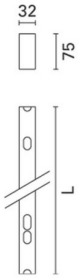
Last information update: May 2024

Product configuration: MJ58
MJ58: High Contrast module L=1197 - direct emission with controlled glare - neutral white integrated electronic control gear





Product code
MJ58: High Contrast module L=1197 - direct emission with controlled glare - neutral white integrated electronic control gear
Attention! Code no longer in production

Technical description
direct emission modular lighting system. High Contrast module with 2 groups of 5 elements using fixed optic LED lamps - flood beam angle. The structure of the optical system produces light emission with controlled glare (UGR < 19). Minimal (frameless) version extruded aluminium profile; partial black methacrylate screens set up for connection to end caps on both sides. Installation can be surface-mounted (ceiling/wall), or pendant. The module must be completed with the accessories kit needed for the selected type of installation. Electronic control gear integrated in the luminaire. High colour rendering LED.

Installation
pendant: complete with power supply unit with cable (MWG5) and suspension cables (MWG6); surface-mounted: complete with supports (MWG7).

Colour
White (01) | Black (04) | Aluminium (12)

Weight (Kg)
2.02

Mounting
ceiling recessed|ceiling surface|ceiling pendant

Wiring
the module is fitted with 5-pin terminal blocks for pass-through wiring at the ends. Electronic control gear integrated in the module.

Notes
High Contrast modules may be completed with accessory end caps (code MX80) and used independently in the various applications. To make continuous lines, use accessory code MX81 with partial screen suitable for overlapping with other modules. Possibility of combined High Contrast / Low Contrast

Complies with EN60598-1 and pertinent regulations

IP20
