EP40: Wall-mounted system with street optic.

Technical description

Outdoor luminaire with a street optic (ST1.2), designed to use LED lamps, supplied with a painted steel wall-mounted arm L=561mm. The optical assembly is made of EN1706AC 46100LF aluminium alloy and subjected to a multi-step, pre-treatment process, in which the main phases are degreasing, fluorozirconation (a protective surface film) and sealing (with a nano-structured silane layer). The painting stage consists of a primer and a liquid acrylic paint, cured at 150 °C, with a high level of weather and UV ray resistance. Diffusor made of shockproof, UV-stabilised injection moulded polycarbonate. Complete with circuit featuring Warm White monochrome LEDs and polymer optic multilayer lenses. Inside there is an anti-reflection film, a cover to stop light pollution and a special glass cover for the wall-mounting. Changeable driver and LEDs. Electronic DALI driver with automatic internal temperature control system. All external screws are made of stainless steel.
