

Collection of exterior bollards for commercial and institutional applications. Available in a round, square design with 3 mounting heights for diverse applications, scale and design. Robust aluminum alloy construction with stainless steel fasteners, factory sealed diffuser and lenses, with five layers corrosion resistant finish. Low luminance with light source regressed inside the luminaire and shielded from all viewing angles. The wide uniform distribution allows greater luminaire spacing while maintaining good visual comfort and eliminate light pollution.

VISUAL COMFORT

A new innovative optic* which guarantees visual comfort. Excellent horizontal effect with high interdistances that eliminates the shadow at the base giving great uniformity from its base to the farthest point from the pole.

Invisible source

The optic is optimised to completely hide the light source from view.

Visual comfort

Invisible source even in compromising situation such as sitting position.

Full cut-off version

The full cut-off version eliminates the luminous intensity* for angles greater than 90° by directing the entire flux to the ground and meet the most stringent constraints of the laws against light pollution.

*Max luminous intensity < 0.49cd / klm at 90°
