**Product code**

MI39: I/O module LON DR-N 8S 10A

Technical description

Independent switching of eight groups of loads. Eight relay outputs (NO contacts, 10 A). Manual control and status indication for each output. Voltage drop detection. Power supply voltage: 24V dc. Wire clamp screw terminals. Software application for controlling eight independent loads according to the LonMark "Lamp Actuator (3040)" profile including timers, logic functions, priority control and configurable output behaviour in the event of voltage recovery or bus reset. Two "Scene Controllers (3251)" are also available.

Colour

Indeterminate (00)

Complies with EN60598-1 and pertinent regulations

The EAC (East African Community) logo, consisting of the letters "EAC" in a stylized font inside a square border.
