Last information update: December 2023

Accessory code

MZ23: Connector for pendant continuous lines

Technical description

Structural connection element for use in Low and High Contrast version iN30 range continuous line pendant installations. The fitting limits the potential misalignment of the successive modules. Fitted with a pendant system, the element is designed to be inserted between one module and the next. (To hang the last module in the line use the standard MWG6 code accessory). If a corner piece is present, insert the MZ23 code accessory in both the corner piece and module and hang centrally using the standard MWG6 code accessory). Mechanical fitting.

Installation

Connection plate to insert between adjacent modules - mechanical fitting with securing plate and screws supplied - includes a steel cable for pendant installations.

Colour

Indeterminate (00) | Clear transparent (24)

Weight (Kg)

0.15

Notes
