Product code
SA86: Wall-mounted luminaire - Warm White - Integrated power supply - Casambi Bluetooth - AF (Up) optic + AS (Down) optic

Technical description
Wall-mounted luminaire with Warm White LED lamps - AF (Up) optic + AS (Down) optic. Consists of an optical assembly, a top glass, a bottom glass and a cover raster to be purchased separately. The optical assembly is made of an aluminium alloy, subjected to a multi-step, pre-treatment process in which the main phases are degreasing, fluorozirconation (a protective surface film) and sealing (with a nano-structured silane layer). The following painting stage consists of a primer and a liquid acrylic paint, cured at 150°C, with a high level of weather and UV ray resistance. The tempered sodium-calcium upper cover glass has black serigraphy on the edge and is 5mm thick. The tempered sodium-calcium lower cover glass has black serigraphy on the edge and is 4mm thick. The product is supplied with an aluminium optic in a set back position for the lower optical assembly to obtain maximum visual comfort and a flush-mounted aluminium optic for the upper optical assembly to obtain maximum efficiency. Fitted with a 2 PG13.5 cable glands for 8.5mm to 12.5mm diameter cables. Luminaire with Bluetooth Low Energy technology (Casambi). Frequency 2.4 GHz. The luminaire can be controlled with the Casambi system app and components that enable on-off, dimming and scene recall functions. The app is available on the Apple Store and Google Play Store. It can be integrated in the system's "Mesh" network that allows multiple luminaires to be controlled. OTA (over the air) update via app. Integrated Beacon that can be activated via an app (iBeacon) that enables smart functions for third party applications. All external screws used are made of A2 stainless steel.

Installation
Max luminaire-luminaire distance (*): 10m; max smartphone-luminaire distance (*): 10m.

Mounting
wall surface

Notes
The raster (whether flush-mounted, with a visible border or a PMMA screen) must be fitted and can be purchased separately. (*In all case, the maximum distance is affected by the presence of physical obstacles, like concrete, brick or metal panel walls.) We suggest that a test is conducted at the installation site.
