## Anti-tilting suspension kit

Design iGuzzini

iGuzzini

Last information update: December 2023

### Accessory code

BE37: Anti-tilting suspension kit

---

### Technical description

Bracket with suspension cables specifically designed to stop the 48V track tipping or turning in serial projector layout situations. The 2 steel cables and manual regulators in the kit allow any track composition with excessive side weight problems to be balanced easily and effectively. Cast zamak balancing levers.

---

### Installation

Upper balancing lever is secured to ceiling using a screw and screw anchor (not supplied). Steel cable L 2000 mm. Double millimetric adjustment system. Lower balancing lever is inserted and secured to track profile.

---

### Colour

Indeterminate (00) | White (01) | Black (04)

---

### Weight (Kg)

0.09

---

### Mounting

ceiling pendant

---

Complies with EN60598-1 and pertinent regulations

---
